Dear Miss. Sawari:

How are you doing? I am writing you in this manner, in dire need of your help, intervention, investigation and assistance in my case.

I was wrongly accused of the offense of a 'smothering' death of my infant daughter, in Cause No. 26,494-A, in the 253rd District Court of Liberty County, Texas. In short the infant died of a SIDS Death, due to the incompetence and negligence of the infant's mother putting the six (6) month old to sleep on a adult bed, with blankets, sheets, pillows, clothes, etc surrounding the infant.

The Autopsy was did by Dr. Patricia J. Moore, Dr. Moore who attested to E-Coli Bacteria that was found in the infant's lungs and as well as Fluid Build-up in the lungs, during her autopsy finding. Moore attested to the fact this is unusual since E-Coli is normally found in the stool. Then I read an article on the correlation between a SIDS and E-Coli. It was made clear E-Coli Bacteria is often found in the lungs of SIDS

related deaths, and not death caused by 'Smothering'.

Dr. Moore is notorious for being biased for the State and non-impartial and was admonished by Dr. Joyce Carter on several occasions, for wholly misrepresenting the cause of death to the jury. Moore also has a history of being Non-Neutral, Biased, Pro-Prosecution and Inaccurate in her assessments on the cause of death, as it pertains to infants. Also I just learned that Dr. Joyce Carter was the one the Bland family got to look at the body of "Sandra Bland" and said it was a Homicide.

In addition, when pressed further, Dr. Moore conceded the cause of death could have been an Accident, and that there exist no evidence the child's death was caused by another. Moore said her opinion premise upon Statements by the Mother of the infant, Detectives and information she received from Law Enforcement from the Prosecution files and determine the cause of death was a Homicide, stemming from suffocation due to smothering. But also conceded she could not determined when, where or how the infant died and what caused the infant's suffocation.

It is also significant to not that they used "Dog Scent Line-Up Evidence". The Dog Scent Line-Up, used by the State to link me to the scene of the crime, is wholly insufficient to establish any corroboration, as the same has been declared "Junk Voo Doo Science", and wholly lacking in evidence validity to establish reliability. It was did by Mr. Keith Pickett. In October of 2009, and subsequent to my Trial, the Attorney General's Office imposed a moratorium [Prohibiting] the use of Dog Scent.

(See also Texas Monthly article dated May-2010 pp. 214).

Please assist me in this highly needed cause by aiding me with the necessary Investigation or Investigator to look into my claim. I pray that you look at the evidence and not what they say I did. I can prove every thing I'm saying and they did not prove at Trial. I am wrongly convicted for a S.T.D. Death, improperly testified to by Dr. Moore as a Suffocation.

Your help and consideration given to this matter would be greatly appreciated. I have a slow death sentence with No help. I am really hoping you can help me in this matter or can put me with the person that can. I really need Dr. Joyce Carter cause my Trial Attorney did not present any 'Expert Testimony' from a Forensic Expert who could have established the cause of death was S.T.D. and who would have refuted Dr. Moore's assessment. My Attorney never looked into Dr. Moore's back ground and it was never showed to the Jury.

If you can't help me and know some one that can please pass my letter on or let me know their info so I can write them for help.

Respectfully Submitted

M. Cockeham
